

UNBC AND FORESTS FOR THE WORLD

Although the UNBC trails do not have any significant elevation changes, they make up for it with the technical/rooty aspects mixed in throughout. If you are an intermediate to advanced technical rider, you won't be disappointed, with the many advanced sections and steep technical climbs. The UNBC trails also provide excellent winter fat biking.

Forests for the World contains over 15 km of trails taking you through a variety of forest habitats. This trail network is multi-use, shared by cyclists, hikers and runners. You will find granular double track trails with rustic single track as you head west from the main parking lot. Although not as technical as the UNBC trail network, you will encounter some short steep climbs. Watch out for moose and bear, and enjoy the lakes.

UNBC TRAILS

- | | |
|------------------|------------------------|
| 1 Dr Connector | 14 Backside |
| 2 Doctor's Trail | 15 Fred's |
| 3 Tyner Finder | 16 Climbing Rock Trail |
